

The FUMMO Indic 12,000 Puffs 20MG [Disposable Vape](#) is an advertised disposable vaping device intended for adult nicotine users in Dubai and the UAE. It is listed with up to 12,000 puffs and 20MG nicotine strength, providing a pre-filled, self-contained format for users who prefer a disposable device without routine e-liquid refilling or coil replacement.

Up to 12,000 Puffs

The FUMMO Indic is advertised with a capacity of up to 12,000 puffs. This provides a higher-capacity format compared with many smaller disposable devices. The actual number of puffs can vary depending on draw length, frequency, and individual usage habits.

20MG Nicotine Strength

The device is listed with 20MG nicotine strength. Nicotine-containing vaping products are intended only for adults who are legally permitted to use nicotine products. Nicotine is addictive and can cause dependence.

Pre-Filled Disposable Design

The FUMMO Indic uses a convenient pre-filled [disposable format](#). It is designed as a self-contained device, meaning users do not need to routinely refill e-liquid or replace coils during normal use.

Compact and Portable Format

Its disposable construction provides a straightforward vaping format that can be carried when appropriate. Unlike larger refillable vape kits, the device does not require a separate tank, e-liquid bottle, or replacement coil for routine use.

Flavour Options

FUMMO disposable products may be available in different flavour varieties depending on the model, retailer, and market. Flavour profiles can include fruit, cooling, mint, and blended combinations. Check the individual product packaging for the exact flavour and specifications.

Understanding the Advertised Puff Count

The 12,000-puff figure should be regarded as an advertised estimate rather than a guaranteed number of draws. Longer or more frequent puffs can affect the overall lifespan of the device, so actual usage may differ between individuals.

Product Information

Specifications can vary between different versions. Before using the product, check the packaging for the exact:

- Nicotine concentration
- Puff capacity
- Flavour
- Battery information
- Manufacturer details
- Authenticity markings

- **Usage and safety instructions**

Safe Storage and Disposal

Keep the device away from children and pets. Avoid opening, modifying, or damaging the device, and follow the manufacturer's instructions. When the device reaches the end of its usable life, dispose of it according to applicable local requirements, particularly because vaping devices may contain lithium batteries.
